SIPHIWE MALINDI

North West, Potchefstroom 2735 | +27 60 974 1314 | smalindi19@gmail.com

PROFESSIONAL PROFILE

Final-year BSc Information Technology student specialising in Software Engineering, with a strong interest in Business Analysis, Business Systems Analysis and technology-driven problem-solving.

Possess practical experience in gathering and analysing business requirements, communicating with clients, documenting functional specifications, developing user stories and translating business needs into technical solutions.

Knowledgeable in the Software Development Life Cycle (SDLC), database management, system design and software testing. Combines technical understanding with analytical thinking, communication, documentation and problem-solving abilities to bridge the gap between business requirements and technical implementation.

EDUCATION

BSc Information Technology — Eduvos | Expected Completion: June 2027

RELEVANT EXPERIENCE (FREELANCE & PROJECTS)

Freelance Web Developer

- Designed and developed responsive websites, including personal portfolio websites, church websites and business websites, aligned with client objectives and organisational needs.
- Managed client relationships and expectations throughout project delivery, providing progress updates, gathering feedback and implementing requested changes.
- Conducted functional testing to ensure websites met agreed requirements, identified and resolved issues, and performed retesting before project handover.
- Independently managed multiple client projects, coordinating requirements, development activities, feedback and project delivery.

E-Commerce Website — Project

- Defined the functional requirements and system design for an online store, covering product catalogue, cart, and checkout flows.
- Designed the user interface and user flows, and translated the design into a working web application.
- Tested core features against requirements and resolved issues.

Eduvos Marketplace — Project

- Acted as Business Analyst within a team, eliciting and documenting user stories, functional requirements, and system design specifications for a campus marketplace platform.

- Translated business requirements into technical specifications for the development team and ensured alignment between requirements and delivered features.
- Coordinated documentation and project files, and facilitated team meetings

UniConnect Live Chat — Real-Time Communication Platform

- Defined functional requirements and system design for an authenticated messaging platform.
- Collaborated on architecture decisions and produced documentation for the solution.
- Tested features (authentication, messaging, camera) for accuracy and resolved issues promptly.

BUSINESS ANALYSIS & DELIVERY SKILLS

- Requirements Elicitation, Analysis & Documentation
- Stakeholder Engagement & Communication
- User Stories & Functional Requirements
- Functional and Non-Functional Specifications
- Business Process Analysis & Workflow Modelling
- Requirements Validation & Management
- Use Case Development & System Modelling
- Agile Methodologies (Academic and Project Exposure)
- Process Improvement & Optimisation
- Client Relationship & Expectation Management

Technical and analytical skills

- Programming: Java, C++, PHP, JavaScript.
- Web technologies: HTML and CSS.
- Databases: MySQL and MongoDB.
- System modelling: Requirements analysis, UML, Use Case Diagrams, Data Flow Diagrams (DFDs), Entity Relationship Diagrams (ERDs).

SOFT SKILLS

Leadership | Public Speaking & Presentation | Problem-Solving | Strategic Thinking | Collaboration & Teamwork | Adaptability | Time Management | Critical Thinking |

Extracurricular Activities (2024 - 2026)

Chairperson, Debate Club | Member, Acapella Club | Member, Chess Club | Master of Ceremonies for Mr and Miss Eduvos 2024
