Siphiwe Malindi

Aspiring Business Systems Analyst / Junior Business Analyst

smalindi19@gmail.com | +27 60 974 1314 | South Africa

Professional Profile

Final-year BSc Information Technology student specialising in Software Engineering at Eduvos, with a strong interest in Business Analysis, Business Systems Analysis and technology-driven problem-solving.

Practical project and freelance experience in gathering and analysing business requirements, communicating with clients, documenting functional specifications, developing user stories and translating business needs into technical solutions.

Knowledge of the Software Development Life Cycle (SDLC), database management, system design and software testing. Combines technical understanding with analytical thinking, communication, documentation and problem-solving to bridge business requirements and technical implementation.

Education

BSc Information Technology – Software Engineering
Eduvos | Final-year student

Experience & Practical Projects

Freelance Web Developer

• Designed and developed responsive personal portfolio, church and business websites aligned with client objectives and organisational needs.

• Managed client relationships and expectations, provided progress updates, gathered feedback and implemented requested changes.

• Conducted functional testing against agreed requirements, resolved issues and retested before project handover.

• Independently managed multiple client projects, coordinating requirements, development, feedback and delivery.

Featured Projects

Eduvos Marketplace | Business Analyst (Team Project)

A campus marketplace platform designed to connect student entrepreneurs with potential customers within the Eduvos community.

• Acted as Business Analyst within a team, eliciting and documenting user stories, functional requirements and system design specifications.

• Translated business requirements into technical specifications for the development team and ensured alignment between requirements and delivered features.

• Coordinated documentation and project files.

• Facilitated team meetings and supported communication between team members.

E-Commerce Website | System Design and Web Development

An online shopping platform designed to support essential e-commerce functionality.

• Defined the functional requirements and system design for an online store, covering product catalogue, shopping cart and checkout flows.

• Designed the user interface and user flows.

• Translated the design into a working web application.

• Tested core features against requirements and resolved identified issues.

UniConnect Live Chat | Requirements Analysis and System Design

An authenticated messaging platform designed to enable real-time communication between users.

• Defined functional requirements and system design for an authenticated messaging platform.

• Collaborated on architecture decisions.

• Produced documentation for the solution.

• Tested authentication, messaging and camera features for accuracy.

• Identified and resolved issues promptly.

Freelance Website Development | Freelance Web Developer

A collection of websites developed for different clients, including personal portfolios, church websites and business websites.

• Understood client objectives and translated them into website requirements.

• Communicated with clients throughout the development process.

• Gathered feedback and implemented requested improvements.

• Tested functionality against agreed requirements before delivery.

Business Analysis & Delivery Skills

Requirements & specifications: Requirements Elicitation, Analysis and Documentation; User Stories and Functional Requirements; Functional and Non-Functional Specifications; Requirements Validation and Management

Processes & systems: Business Process Analysis and Workflow Modelling; Use Case Development and System Modelling; Process Improvement and Optimisation

Stakeholders & delivery: Stakeholder Engagement and Communication; Client Relationship and Expectation Management; Agile Methodologies (Academic and Project Exposure)

Technical & Analytical Skills

Programming: Java, C++, PHP, JavaScript

Web technologies: HTML, CSS

Databases: MySQL, MongoDB

System modelling & analysis: Requirements Analysis, UML Diagrams, Use Case Diagrams, Data Flow Diagrams (DFDs), Entity Relationship Diagrams (ERDs)

Professional & Interpersonal Skills

Leadership | Public Speaking and Presentation | Problem-Solving | Strategic Thinking | Collaboration and Teamwork | Adaptability | Time Management | Critical Thinking

Extracurricular Activities & Leadership | 2024–2026

• Chairperson – Debate Club

• Member – Acapella Club

• Member – Chess Club

• Master of Ceremonies – Mr and Miss Eduvos
